COMMENTS:

As for the previous withdrawn application, this is completely unsuitable use of this site for two reasons. Firstly, the road is unsuitable for the traffic volumes proposed. The adjacent tyre company already causes regular traffic disruption, and adding many more heavy vehicles turning in and out of the same entrance will make matters far worse. Secondly, the site of large oil storage in such an environmentally sensitive site is completely unacceptable. No matter what steps are taken to prevent spillages and leaks, the affect on the local water systems (lakes and river) of any such event are enormous and the risk is too great to take. We desperately need more parking for the incredibly successful Elizabeth Line at Twyford Station. This would be a perfect site for a car park - probably more profitable than oil storage.
