COMMENTS:

I have lived round charvil for 20 years I walk the lakes daily on my dog walk I believe speedy fuel will not only disturb the wild life with all the noise of heavy vehicles.swans have been nesting at that end of the lake for years .also I cross the road to assess the river and the meadows this is dangerous enough with out the added traffic of heavy vehicles pulling in and out making the view crossing the road virtually impossible .The noise from ongoing heavey vehicles early in mornings is inconsiderate to this area .also nothing should be pumped into our rivers and the risk of contamination is very high from spills and flooding I believe that the site is not suitable at all for the purpose of holding and distributing fuel
