COMMENTS:

One major problem to the development will be the movement of large vehicles using the small ingress and egress to the Shinfield Park residential development causing difficulties for residents leaving the estate for work, school, social Purposes at any time. There have already been problems during the demolition phase . We have no other means to enter or leave. Traffic along the 3270 is going to be even more congested with large vehicles trying g to join the queue travelling in either direction particularly at rush hour when the surrounding roads are already blocked.
Damage to the local environment has already been caused by the plumes of dust we have had to endure for months
