COMMENTS:

I am writing to make my objections to Speedy Fuels' application to change the use of the former Prince Bros site.

Living in the area, the frequency with which that area floods gives me strong concerns as to the safety of this site and the potential for toxic spillages.

It is also not a road that can support the lorries that will be required, both from the lack of safe sight lines from the entrance and the size of the vehicles leaving the site. Approving this site would be an abrogation of your duties to the surrounding area.
