COMMENTS:

The green space by kingfisher grove has already been taken. We have no green spaces yet. 49 houses means at least 49 more cars in the area, potentially 98 if the households have more than one car.

If the development goes ahead the traffic will increase more heavily than it already is, adding to climate change and no benefits to our environment. It can often take hours to get from the Basingstoke road to the M4. The volume of cars on the road is already high.

The majority of the village is now built on with no green space in the area. We do not need anymore houses.
