COMMENTS:

I object to the proposed communication kiosk on the grounds of :

- it's not in keeping with the village. It is not replacing an existing pay phone.
- the village already has multiple defibs
- visibility when exiting our parking area would be reduced with the potential to cause accidents to both traffic and pedestrians, currently we have had no accidents. Our parking area currently serves 4 households and 3 businesses.
- Other illuminated signs in the village have been rejected
- The village does not warrant a communication kiosk it does not have a high volume of pedestrian traffic day or night. We are not a town or city.
- Unnecessary disruption to households when being installed with no real knowledge of impact on infrastructure to the buildings or pavements .

-
