COMMENTS:

Development on this area would be an utter Joke considering that school Road was closed to reduce traffic to aid child safety and now its being considered allowing an additional 140+ cars frequent an area which is already boarderline dangerous at school drop off / pick up times. It will also diminish the schools ability to educate the children on the the eco system outside due to the green spaces becoming a concrete jungle not to mention a reduction in air quality by more cars and pollution around the school.

The abomination of Traffic calming measures introduced on Mole Road will also struggle to handle any additional traffic as witnessed in the summer evenings car meet!
