

This architectural elevation drawing depicts a three-story residential building facade. The structure is characterized by a series of gabled roof sections and a symmetrical arrangement of windows and balconies. The facade includes multiple multi-paned windows, larger bay windows, and balconies with railings on the second and third floors. The drawing is a black and white line art representation.

This architectural elevation drawing shows a symmetrical building facade. The central element is a gabled section with a steep pitch. To the left of this central section is a rectangular volume featuring three balconies, each with a simple railing. To the right is another rectangular volume of similar height, characterized by a vertical arrangement of windows. The drawing uses fine horizontal hatching for shading and is set against a plain background with a solid grey base representing the ground level.
