COMMENTS:

The current infrastructure in Shinfield is overwhelmed and cannot support more new houses. The traffic each morning from Shinfield meadows to the M4 is often gridlocked. I work in Slough and it takes me longer to drive a couple of miles to M4 junction (11) than to drive the remaining 19 miles to Slough. More houses in Shinfield will only cause more traffic and pollution.

The fields that are proposed for development often flood and more houses will only increase the flood risk to existing properties.
