COMMENTS:

The infrastructure is still not in place for the last lot of houses that have been built. The council is not able currently to give all catchment primary schools to this area. We have 1 failing secondary school that is being supported to make drastic improvements, nil else around this area and there is continuing to be new houses built around the next nearest schools too which will make it harder for us to get in there when we need to. Where is the school provision for this area?! We need schools built before houses! I have neighbours that are at lower earley and aborfield schools that couldn't get catchment schools. With body's farm development on the horizon, with the infrastructure, this is too much!
