COMMENTS:

I wish to formally object to the proposed housing development on the grounds that it poses serious risks to the wellbeing of the existing community. The local sewage infrastructure is already under strain, and adding further demand could lead to environmental hazards and public health concerns. Additionally, the increased population density will inevitably result in heightened noise pollution, disrupting the peace and quiet that residents currently enjoy. Most critically, essential services such as schools, dental practices, and GP surgeries are already operating at full capacity. This development would overwhelm these vital resources, reducing access and quality of care for everyone in the area.
