COMMENTS:

I would like to understand what the plan is for the extra vehicles the construction will bring to Victoria Road. There is very limited capacity for trades to park their vehicles on a daily basis, for an extended period without the residents on this road suffering as a consequence. How will large vehicles (lorries & trucks) access the building site - due to on street parking, the road often becomes one way and we already have issues with large vehicles getting stuck / not being able to manoeuvre when they access the tennis club. This question has been asked in multiple forums with no answer.
