

Detail 01

Detail 02

NOTES

1. Refer to Design Criteria report SA-275-REP-001 for information on load assumptions, performance criteria, and materials specification
2. All works must be undertaken by competent persons in accordance with manufactures recommendation and best practice
3. Where highlighted as requiring **Caution** additional on-site investigation may be required along with care during works 
4. Reference must be made to the Architects drawings and details for setting out and coordination. Any discrepancy in documentation should be notified to the engineer and architect immediately
5. Any information related to existing structures and underlying ground conditions are subject to verification on site. Any observed deviations from the assumptions presented must be notified to the engineer immediately.

LEGEND
