Wall bricks - [RT 150 Ultima - Linear Facing Brick Waterstruck](#)

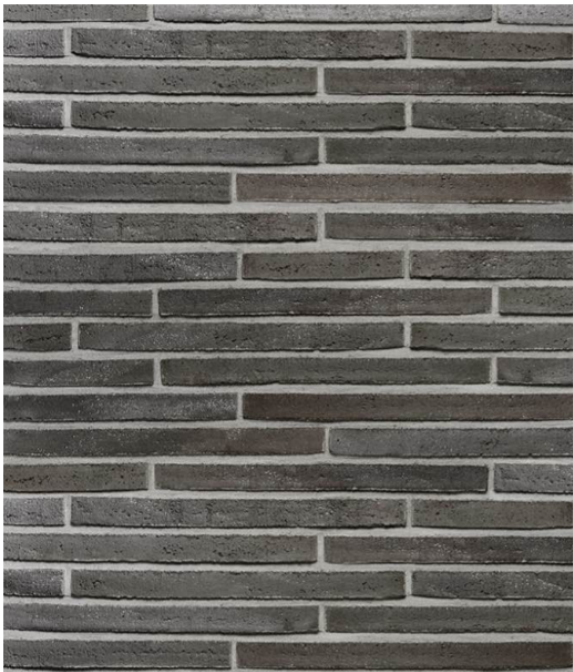

DARK AND HANDSOME

The RT 150 is burned dark – without turning black and gloomy. It is strong and weighty – yet soft. Put together, its varying surface comes to life and turns vivid black.

GWP:	32.78 kg Co2-eq / m2 (A1-A3)
Compressive strength:	20 N/mm2
Gross density:	1950 kg/m3
Water absorption:	13 %w/w
Initial rate of absorption:	1,4 ± 0,5 kg/m2
Exposure class:	MX3.2, MX4

Ultima is a waterstruck brick in an exclusive linear format. Ultima has the length of two ordinary bricks and a height of just 38mm. The long format creates a unique and distinctive expression. The obvious choice for exclusive projects.

Please note: Reference images are indicative and variations in color play may occur depending on the brick's firing and surface treatment. Product photos are studio shots of dry bricks. Finished masonry that is exposed to wind and weather will naturally change expression. We therefore always recommend seeing real reference buildings.

Cladding - [Exterior Oak Cladding | Vastern Timber](#)

Oak Cladding

Oak Cladding

Durable and tough, oak wood cladding has long been a popular choice for timber cladding projects. Our oak cladding boards are carefully selected for limited knot content and are supplied in either random lengths or finger-jointed formats, depending on the requirements of your project. This makes oak suitable for use as wall cladding in both traditional and contemporary designs.

Style	Traditional
Profiles	Halflap, shiplap and splayed
Source	UK and France
Beware	Instability and tannin

Garage doors - [Hampton](#)

Up & Over Garage Doors

Timber Panel: Hampton

The Hampton is a wide board vertical cedar garage door constructed using 138mm wide boards. This door is constructed purely from solid red cedar and constructed around a galvanised steel box section chassis for strength and rigidity. With initial and regular staining, the door will keep its stunning appearance and last a lifetime

Rondo front door

The "Rondo" front door and its vertical variation, the "Rondo V", are two of our bestselling door styles. And it's easy to see why.

The simple grooved panelling is given a contemporary design makeover, with alternating panels of different sizes. Our expert, in-house team will design the position and pattern of the alternating boards to work best with your overall build aesthetic.

Browse the gallery below to see different variations of the "Rondo" front door in situ.
