COMMENTS:

Approval of this application would be misguided and to the detriment of residents and the surrounding natural environment.

This area regularly floods and the storage of fuel is highly dangerous with risks to polluting the fields, wildlife and river every

Autumn/Winter. Furthermore, the road is not suitable for HGV access and would be greatly disruptive to the local community and road users.

This road is also used by attendees of both Waingels and Piggott in their daily commutes further increasing the risks of having fuel storage and HGV traffic required.

Having travelled via this road for years when going to school, I would be devastated to see it decline further after suffering countless

building works and developments which have already placed strain on the area.

Thank you for your consideration.
