COMMENTS:

We would like to object to the retrospective planning permission of the carport under the coach house. We have the carport next door Mr. Alves has stated many times and reported as many times for storing things other than a car in the carport. He has stated that anything other than a car is a fire risk to his property above. We have been refused permission to have a container for non-electrical garden equipment and also we've been from refused permission for a teardrop caravan to be stored in the carport. By his own words, Mr. Alves has stated to us numerous times that anything other than a car would cause a risk to his property and therefore the application should be rejected based on this. We know he was using it as an office and we know that this contains electrical points in the room.
