COMMENTS:

I strongly object to this planning application and ask WBC to refuse the application.

The proposed development is unsustainable as ruled by the Inspector in 2023. The current proposal does not remove the significant harm this development would do to a thriving rural community. It would have a devastating detrimental impact on essential local habitat and wildlife. (The dramatic decline in butterfly numbers announced only today would be aided by removal of this valuable arable land and open countryside). Tape lane frequently floods after moderate rainfall and the sight of raw sewage flowing in the middle of the village is too frequent as is several homes being unable to use toilets and showers due to backed up water as a result of infrastructure that cannot cope with the current residents needs. I would one day like to have a home of my own but I do not wish to see inappropriate developments built on countryside and much needed arable land in unsustainable locations.
