Compton Close - 16, 8, 7 } object - proximity to residences
Stanton Close - 43, } health risks
Woodley TC - object due to prox. of residences.
Earley TC - object due to prox. of residences, & pot. health risk. Inappropriate & a neighbourley dev pt.

Planning Issues :

Effect on street scene & neighbouring properties
Identified settlement.

Application Number: TL/2000/2565

Appraisal :

This application is for a 15m high monopole It will replace the existing monopole approx 12m high.

Neighbours.
The nearest neighbour is a distance of 37m away. This is fairly close to residential properties however there is an existing mast situated in the same location. The existing mast is also 15m high monopole. The proposed mast is also 15m high and is also on a monopole with a diameter of 0.5m, 0.15m larger than the existing pole. The existing pole has established impact therefore, any impact on neighbouring properties will be minimised.

Street scene.
The proposed mast will be 15m high, approx the same height as the existing mast. It would be a monopole with a diameter of 0.5m. As the existing pole has established impact the proposal, although 3m higher, would not have sufficient impact on the surrounding area & street scene to warrant a refusal.

Recomendation : Approval: ☑ **Refusal:** ☐

No of Pages	**1**	**Our Ref**	**RS/3228-U001/Mill01**
Subject	**Upgrade of Vodafone apparatus at Earley Station. WDC ref : TL/2000/2565**		

Further to our telephone conversation this afternoon and with reference to the above I wish to confirm the following:

1. The existing pole is 15m in height. Please ignore the scale on drawing 3228-T3 accordingly. This drawing is not necessary as a part of the notification anyway.

2. The new pole will be erected on the same base as the existing pole, which will literally be unbolted and the new one bolted in the same place. The purpose of changing the pole is so that it can be climbed, minimising the need for the use of cranes and cherry pickers. It is designed to be interchangeable with the existing type of pole.

3. The concrete base to the west of the site is the remains of the very first installation. It was not broken up when the site was last upgraded and has therefore been included in the schedule of works for this contract.

I trust the above is of assistance to you. Should you require any further information, please do not hesitate to contact me.

Regards

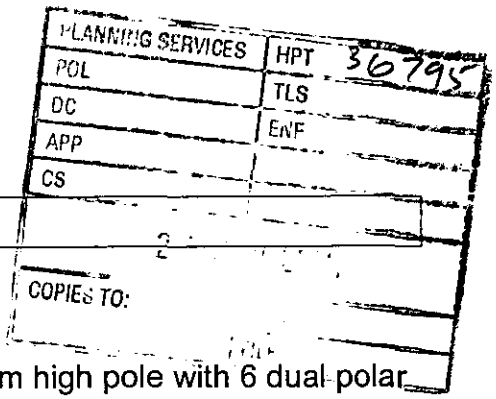

ROGER STILL

EARLEY. **TOWN CONSULTATION SHEET**

Application Number: TL/2000/2565

Proposal: Proposed replacement of existing pole with new 15m high pole with 6 dual polar antennae and 2 microwave dishes..

Site Address: British Rail Railway Station, Station Road, Earley, Reading.

Applicant: Vodafone Ltd C/O Roger Still, Terracom Estates Ltd.

Your observations are required in respect of this application **by 17/11/2000** .

The Town Council's remains of the view that telecommunications equipment such as this is unacceptable in close proximity to residential properties, in view of the fact that the health implications of such equipment have been neither proved or categorically disproved.

Whilst it is noted that this application is in respect of the upgrading of existing equipment on this site, Councillors felt that the original installation was inappropriate and unneighbourly and felt therefore that this application should be refused, and that the applicants should be asked to consider resiting the entire mast in a more appropriate location away from houses.

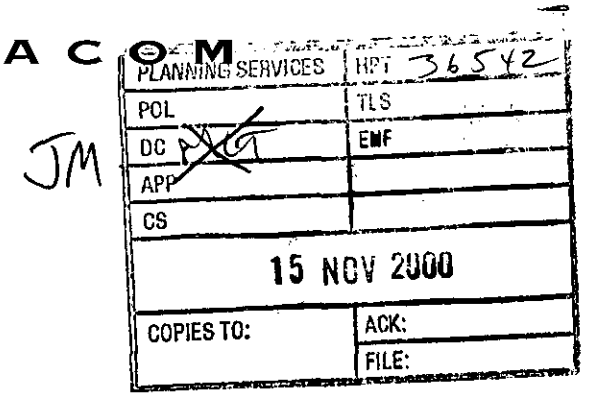

The Town Council is in receipt of two letters of objection.

SIGNED: _____ DATE: 16 NOV 2000

Clerk To Woodley Parish/Town Council.

Dear Sirs

Re: **Proposed upgrade of Vodafone telecommunications apparatus at: Earley Station, Station Road, Earley, Berks.**

I refer to your letter of 13 November 2000, in which you ask about the possibility of re-siting the scheme.

Vodafone have occupied the site in question and for a number of years, as you are probably aware. Vodafone's landlord in this case is Railtrack, and when sites are identified under their national agreement for the purpose of a telecommunications base station they have to offer a safe compound in which Vodafone's operatives can work where track side access is not necessary. In the majority of cases this means that the land identified is already sub-let to the Train Operating Company (TOC).

This means that they also have an input into giving operational clearance for the apparatus. Their criteria include the impact on passenger traffic in addition to the safety aspects. Further more, they have to think about the impact on revenue. So for instance, if the apparatus were to be situated in the station car park, it would have a detrimental effect on income, as it would take away the annual income from at least two parking spaces. As Vodafone's rent is paid to Railtrack, the TOC are not compensated for this and will not therefore allow a new installation in the car park.

The current site therefore offers the best in terms of accessibility and above all safety for Vodafone's engineers, and minimum disruption for both Railtrack and the TOC.

TERRACOM

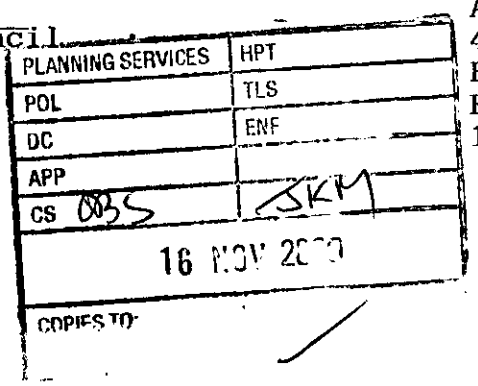

In addition, the head-load on the pole is due to be swapped anyway, and this can be done under schedule 4 of the Licence granted to Vodafone under schedule 7 of the Telecommunications Act, 1984. The reason for the new pole is operational, as it can be climbed. This means any repairs or maintenance can take place without the need for cranes or cherry pickers, which require track closures and can take weeks to arrange. If prior approval is refused, the development will go ahead without changing the pole. However, this will result in greater inconvenience to station users and residents through periodic access by cranes, sometimes at night, as track closures during the day are very expensive.

I hope the above provides sufficient explanation for your purposes, however if I could be of any further assistance, please do not hesitate to contact me.

Yours faithfully

15 Nov. 2000

Dear Sir,

Re: Planning Application No. TL/2000/2565

When the original planning application was made for the "Voda-Phone" antennae, the rail company did not make it clear on informing us that the antennae could be a possible danger to health.

Voda-Phone was not mentioned in the letter, leaving me to believe that the application was solely on behalf of the rail company and for the day to day running of the railway.

If I had known at the time of the original application I would have objected then.

I object to the present application on the following grounds.

(1) A higher output Antennae means a higher potential health hazard.

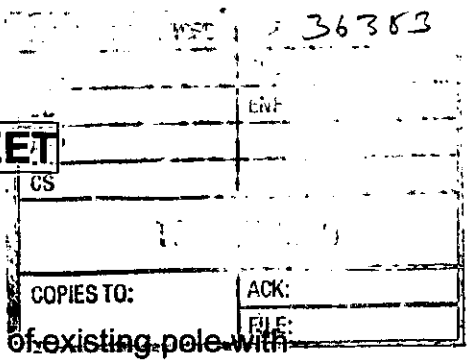

(2) Too close to residents homes.

(3) With nearly Two billion pounds profit this year Voda-Phone can afford to relocate the Antennae in a non residential area.

Yours faithfully

Angus MCGhee

Dear Mr Still,

RE: PROPOSED REPLACEMENT OF EXISTING POLE WITH NEW 15 METRE HIGH POLE WITH 6 DUAL POLAR ANTENNAE AND 2 MICROWAVE DISHES AT EARLEY STATION, STATION ROAD, EARLEY (TL/2000/2565)

I refer to your notification for a telecommunications 15 metre high pole with six dual polar antennae and two microwave dishes.

I write to formally advise you that the Local Planning Authority requires prior approval of this scheme, in view of its proximity to residential properties.

I would be grateful if you could advise me within 14 days of the date of this letter if you are able to revise the scheme and resite it to an alternative location, which would be significantly further away from any sensitive issues.

Yours sincerely

Dear Sir/Madam,

RE: PLANNING APPLICATION NO. TL/2000/2565 – REPLACEMENT POLE

I write with reference to Richard Raymond's letter, from Earley Town Council, dated 02/11/2000 regarding the replacement of the existing communication pole.

Please take this letter as my official objection to the proposed application. My objections are based upon many health and safety concerns that I have with regards to so much transmission equipment being permanently located so close to my home. I am a grandparent and as such, my young grandchildren regularly visit and play in my garden. Bearing in mind the present uncertainty and speculation over the danger posed by telecommunications equipment at present, I would not wish for anymore to be located so close to my property.

I hope that you will take note of my observations ands concerns here and I would strongly urge you to reject the application that has been placed before you.

I look forward to hearing from you with the results of your discussions in due course.

Yours faithfully

Dear Sirs

Re: **Proposed upgrade of Vodafone telecommunications apparatus at: British Rail Station, Station Road, Earley.**

I enclose a GPDO notification with respect to the above development. This replaces the previous proposal outlined in my letter of 15 September 2000 with accompanying schedule 4 notice, in which the antennas were to be changed.

The new proposal incorporates a new support pole which will allow the structure to be climbed for maintenance and repair work. This kind of is particularly useful in residential areas and beside railway lines as it negates the need for cranes and cherry pickers, minimising the disruption to residents and railway users.

I trust you find this proposal satisfactory and look forward to hearing from you.

Yours faithfully

Roger Still
Project Manager
