## Comments On Proposal

No EH objection

As advisory, I would recommend the developer engages an appropriately qualified consultant/engineer to carry out a noise impact assessment to inform the final design and positioning of the ASHP. It is commendable the developer is using a green energy alternative, however, It is very much in their interest, and best practice, to have this professional advice for the design layout for the long-term benefit of the project and will avoid any need to move any of the pumps post completion.
