COMMENTS:

As other comments - no reason to change the car parking layout with an additional road. This serves no benefit to the current PUB / Restaurant . The change of business operation to a hotel will have a negative impact to neighbours as the facility being a hotel would require movements, more road access and noise pollution 24x7 365 days of the year. The area is 100% residential area. Clearly another attempt to gain access to the field that the developer is determined to cover with houses. The land owners have already removed oak trees without permission and due care to the enviroment, previous applications have all been rejected 232621, 241556, 231990 therefore I on all the points above I object to the application
