Hi Kieran,

Thanks for the updates. The applicant has confirmed that the site will be C2 use and there will be no more than three on-site staff at any given time, which would be 2 carers and 1 manager. The level of parking can be acceptable for the proposed staff no.

Meanwhile, it will be your decision to decide if tandem parking is acceptable for C2 use.

If you consider tandem parking to be acceptable for this instance, could you ask the applicant to revise the parking plan and clarify the operation details (including staff rotas, arrangement of staff changeovers and visitor management) in the revised planning statement.

Kind regards,
Jennifer Pang
