

The attached plan shows where the trees are on our property. T7 Holm Oak requires reduction and T8 Red Oak is the one we would like to move to the new position as indicated

Photo of T7-photo shows significant growth. The tree was previously given permission for pruning in 2020 and requires this again to prevent breakage and overhang in road

Photo of T8 - Red oak. This tree was a replacement of another tree historically under TPO. As it is a replacement it is not a large established tree and therefore is not visible for local amenity benefit and environmental visual appeal.

We would like to re position this tree to allow for a garden room, not requiring planning permission, in the corner of our property garden.

Please can you call either home owner on the below numbers for the site visit
