MURDOCH ROAD CONSERVATION AREA: PROPOSAL FOR WORK ON TREES

We attach a proposal for work on trees at our address, which is in the Murdoch Road Conservation Area. The separate trees involved are:

- a. Sycamore, at A on the plan below.
- b. a group of Hazel, at B.
- c. Portuguese laurel, at C.
- d. Prunus variety, at D.

We have discussed the work involved with [REDACTED] of P A Tree Care Ltd.

We have mainly followed the numbering of the sections in the Application Form on your website but, as most of the sections are not relevant, we have abbreviated the layout.

Photographs of the trees are included at the end.

Viewing the trees: The prunus tree (D) can be viewed without difficulty from Crescent Road. To view the others properly will require access to the rear of our property. If you wish to do so, please contact us to agree a time.

Thank you for your help. We look forward to hearing from you.

[Electronically signed]

Mr and Mrs Kendall

APPLICATION FOR WORKS TO TREES IN A CONSERVATION AREA.

1. Applicant Name and Address Mr and Mrs Kendall
15 Crescent Road
Wokingham
RG40 2DB

2. Agent Name and Address No agent

3,4. Trees Location and Ownership As in section 1, but one tree (C) is in No 17 Crescent Road

5,6. In Murdoch Road Conservation Area. No tree preservation order.

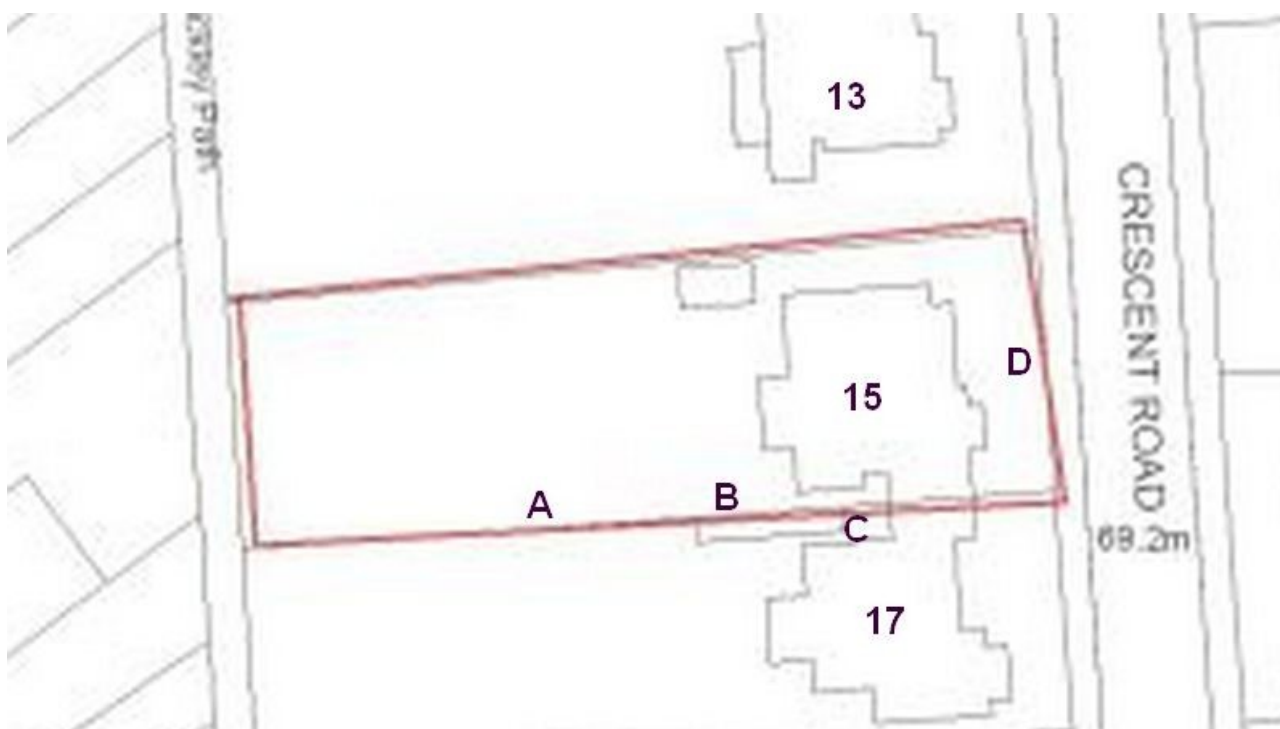

7. Identification Of Trees And Description Of Works:

a re-pollard the sycamore at A on the plan below. This has been previously pollarded (your letters of 2 October 2007, and 25 January 2019, refer) and we now propose to repeat this back to the earlier pollarding cuts.

b. coppice a group of hazel trees at B on the plan. These have been previously coppiced more than once.

c. prune back a Portuguese laurel, at C on the plan. This is not based on our property, but on our neighbours', No 17 Crescent Road, very close to our boundary. The laurel has now grown to extend some 1.5m over the boundary, so as to rub against the walls of our house giving concern that it will soon damage the walls or roof. We propose to cut it back to the boundary. We have of course discussed and agreed this with our neighbours.

d. remove dead wood from a prunus-type tree at D on the plan. You will want to note that this tree overhangs Crescent Road, and thus may attract more attention than would otherwise be the case.
