COMMENTS:

The area in which we live has seen unprecedented building and growth, far in excess of what the local roads and infrastructure can cope with, which will only increase as those houses still being built are occupied and as families grow. Now there is another huge development planned, which gives no thought to the long term impact. Local countryside and habitats are destroyed and razed to the ground and are replaced with bland sangs , with the planting of trees which are not watered or looked after in the initial phases and are planted too close together to thrive. Primary schools are often promised, with no consideration to where the children will go once they need a secondary school. Or cancelled as in the Buckler's Park Development (there may be a drop on birth rates but where will all the children who are born to families at Buckler's now go?) I strongly object to this proposal which is far in excess of building quotas for our local authority.
