COMMENTS:

Please read below the reasons I am strongly objecting to the plans to build the new housing development on Longwater Road.

There are several reasons I am objecting to these plans today; worries for over populating the area, concerns for traffic where public transport is inaccessible and a housing estate that does not fit, but in fact harms the nature of the surrounding area.

We understand that there are already issues with capacity in local nurseries and doctors. Building more houses would result in more strain and competition for these services.

There are no local bus routes that pass directly through this area and the nearest train station is 3 miles away and therefore is likely to be accessed by car. All new inhabitants will need to rely on cars for all of their travel, causing serious congestion to the local area.

The planned houses do not fit with the style of the local houses. They will cause harm to the local wildlife by removing habitats and adding a modern 2 storey estate to this road would completely change the character of the road.

I have a niece growing up in this area and I hope that these plans are rejected so she can grow up in the safe, not over populated, picturesque area her parents have chosen for her.

Thank you for taking the time to read my objections.
