COMMENTS:

We are a very growing community in Wokingham. To practice our faith we have to go to mosque 5 times a day. Currently we have got one at the far end of Wokingham for which we have to go by car. If we get one near by then it will serve the local area of earley, lower earley, winners sh woodley. We can go there by walking which will reduce carbon emission, solve parking problems in other mosques. Also other than prayer it will serve the purpose of youth education, community gathering, interfaith discussion etc.

because of all these I strongly support this application

.
