

Proposed Removal of Ash Tree at 44 Sturges Road

We are the owners of 44 Sturges Road and have obtained planning permission for a rear extension.

As part of the initial assessment for the project, our proposed builder identified a self-seeded ash tree located on the boundary between our property and the neighbouring property (the neighbour's extension is visible on the right-hand side of the attached photograph).

We propose to remove the tree to facilitate the approved extension works.

The project is currently at the quotation stage, so no construction timetable or final costs have been confirmed. However, as the property is within a conservation area, our contractor has advised us to seek guidance from the Council and obtain any necessary consent before undertaking any work to the tree.

A photo of the tree is included on the following page:
