Comments On Proposal

SMA drainage layout drawing PLN-8-4014 E dated 03/03/2025 indicates that runoff from parcel 8 will be attenuated, for events up to and including the 1 in 100 flood event, with a 40% allowance for climate change, with discharge controlled at 2l/s to the existing beyond the southeastern corner.

This is in accordance with the **outline drainage strategy drawing SK-203 A dated 08/08/2018**.

Causeway drainage calculations dated 03/03/2024 indicates that there will be no flooding events up to and including the 1 in 100-year flood event, with a 40% allowance for climate change.

There is however surcharging of at tank 2 and node 6, for the 2-year event. There should be no surcharging for the 2-year event. As such we would recommend that the drainage design is revised and the pfd simulation files submitted for auditing, to ensure that all flood events have been considered.

We note that SuDS maintenance will be carried out in accordance with **SMA drainage maintenance and management plan note 6860.TN03 02 dated**

28/02/2025 by various authorities (water authority, highways authority, Private owner or a management company).
