COMMENTS:

I am writing to express my full support for the replacement facility on Church Lane. i am pleased to see that this facility is single story hence not really visible to the road with good access on to a straight run on Church lane meaning a good line of site for access and departure.

The location is perfect for the members who are all volunteers and will save significant travel for those involved. I can see no reason to oppose this application due to its un-obstrusive design and would like to confirm my full support.
