COMMENTS:

This is a residential area, with plans to add more housing in the vicinity of the Heron Industrial Estate. Working on the Heron Industrial Estate site from 0.70 to 0.23 hours with heavy and noisy machinery each working day will disrupt the lives of all families living in the area. Sleep deprivation and constant noise from the facility could cause a great deal of anxiety, stress and depression which will inevitably put pressure on our already overworked doctor's surgery.

If just one unit is given permission to work these hours, then other units may follow suit with similar applications, which will compound the issue even further.

I repeat, this is predominately a residential area, where owners and tenants should be free to enjoy a peaceful and uninterrupted existence within the privacy of their own homes.
