

if you zoom in on pictures as I have attached (which I have done), you can see that although there is a group of oaks covered by a TPO it's actually just a single oak I need to work on at the back of the garden. Which is Mr Harding's tree. It has a TPO. It is T6.

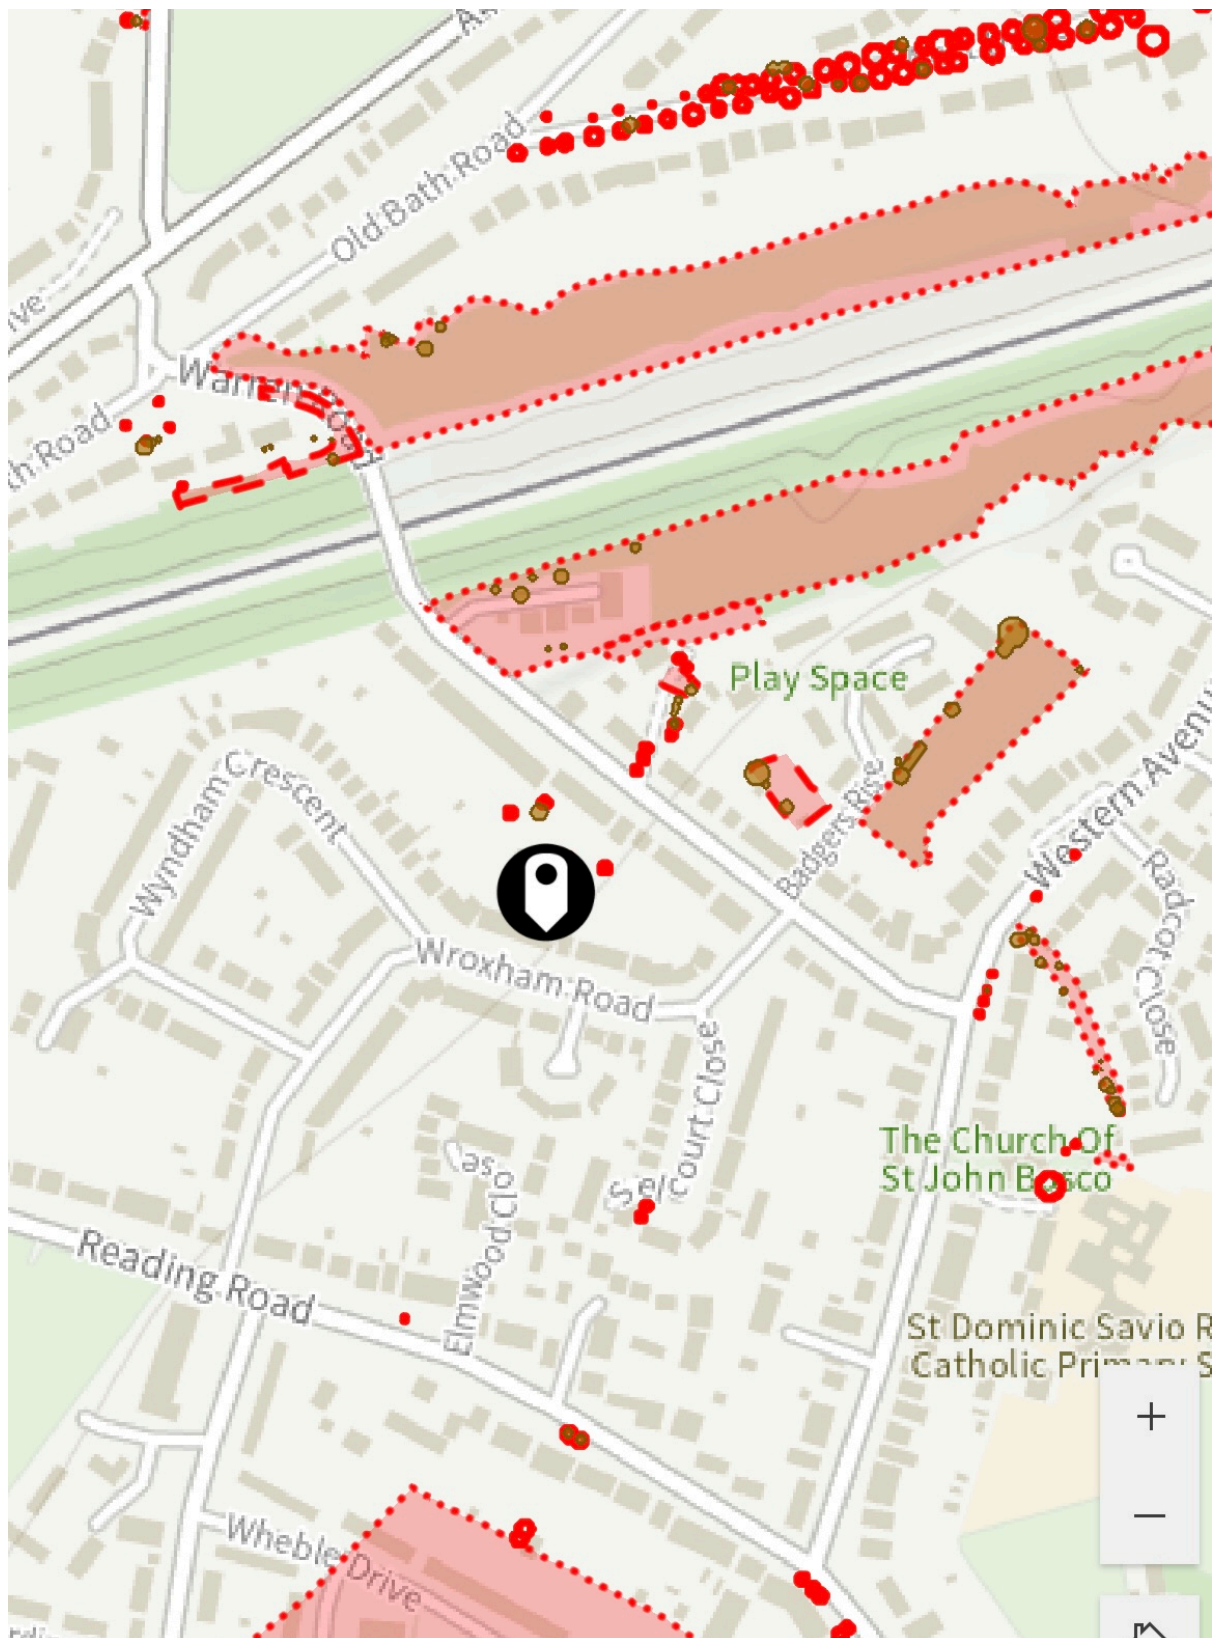

I have attached some more maps and zoomed out so you can see more Road names. I've also attached a map and circled the single oak T6 I wish to work on in Green. You may need to zoom in to see it. I hope this helps.

Reason:

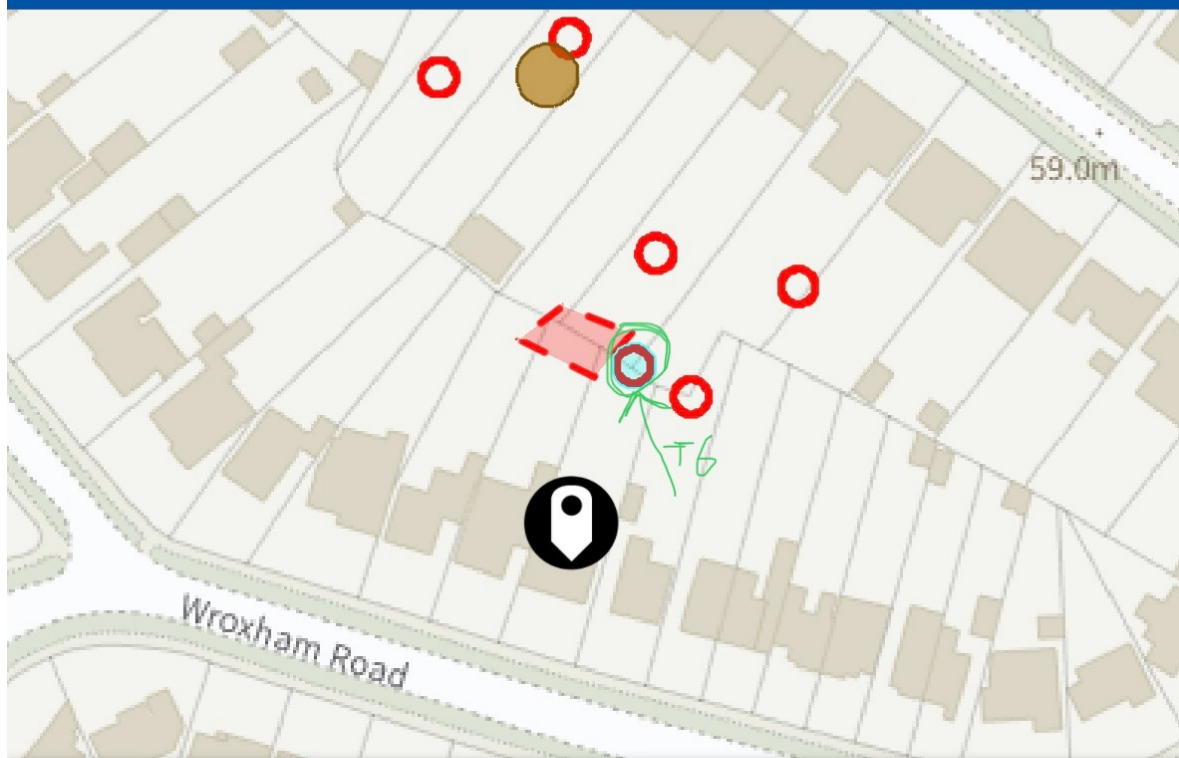

Some lateral branches are very long and have quite a lot of weight in them, one has actually already snapped out and fallen into his garden. He just wants them bringing back about 3 m or to best convenient growth points.
