COMMENTS:

This will have a massive impact on the village and surrounding areas. The roads can't cope with the traffic that we have now. They have built new houses here and not one is for the locals, it's all about money not what we need in the area. Wildlife will suffer as it has no where to go now. Red kites and small birds flourish in these fields, where will they go once all this land has gone. This will be a crime if this goes ahead, as where does the developer come from they are not even local. The people buying these houses are not from around here they come from London and people along the line from Reading to London. How is this better for the environment when they use their cars not the public transport. You struggle to get people out of their cars now so how will you in future. The road system around here is designed for tractors not the volume of cars you are allowing from this project. NO TO THIS JOKE OF A PROJECT. The land is for crops of which we should be growing more to feed our country and its people.
