COMMENTS:

I have lived at my address since 2006 and love the wildlife and lakes at the back of our house . I object to this being used by speedy fuels as I worry about the fuel leaking into the lakes and killing all the wildlife. I also object because the road called the old bath road is total worn down and full of massive holes already and the use of many heavy goods vehicles will make this road much worse. I think it's disgusting how the council would even consider letting them use this area to store fuel .
