COMMENTS:

As being a CHARVIL resident for over 20 years I do not agree with the application of the speedy fuel for many reasons.

1 this will effect our wildlife that needs to be preserved swan nest every year right next to the position and pollution noise will disturb them every year it is the same pair of swans.

2 our small road from CHARVIL to twyford the old bath road can not handle that amount of heavy vehicles going through on a daily basis the road is bad enough on everyday daily traffic .

3 Pollution in this beautiful country side setting where people can enjoy the fresh air on there daily walks will be a thing of the past we will have to breath in all them fumes and as a asthmatic this will effect me personally.

The reserve is ther to protect the wildlife and crossing from one side to the other is dangerous enough adding heavy vechles to that list will make it 10 times more dangerous
