COMMENTS:

My main concern, is the high risk and the potential damage to not only the lake, the fish, the ducks, birds etc and other wildlife. This was never a suitable location for a fuel depot. The site is a flood risk. It only takes one leak of fuel into the lake and it will have a

massive impact on the wildlife. The smell of fuel as you walk past that section of lake is not acceptable this is meant to be a country park for all to enjoy not to be ruined by this unsuitable type of business.

The extra traffic and the holds up along the already busy Old Bath Road will be a nightmare for all. The site will be operational; Mon to Friday 5am to 6pm, Saturday 5am to 2pm, Sunday 6am to 4pm, Bank Holidays 6am to 4pm.

The anticipated daily traffic movements are. Mon to Fri - 59 44 Tonnes Artics and 73 x Cars/Vans, Sat - 12 44 Tonnes Artics and 20 x Cars/Vans, Sun - 6 x 44 Tonnes Artics and 2 x Cars/Vans. This is not acceptable and will change the area forever which the residents do not want. Please listen to us! This is going to increase the danger to school children crossing this road morning and afternoon. This is not acceptable.

Also adding to the traffic on the very busy A4, not to mention more air pollution. This is a village location.

Parking for up to 15 fuel tankers on site! What an absolute nightmare. Please stop this from going ahead.
