COMMENTS:

The area already has vast numbers of housing, with multiple large new developments being built in recent years. Little or no infrastructure has been put in place to help accommodate this housing and so the schools, road and what little passes for local amenities is already overwhelmed. Adding more housing to this serious problem, only further damages the community. There is not enough primary or secondary schools in the area, so children have to travel further and further afield for an education. Whilst doing so on jam packed roads that cannot cope with the increased volume of traffic. The areas traffic, particularly at peak hours is already unacceptable, with long queues and again, no road network improvements to accommodate the increased housing. It's important to residents to maintain the rural aspect of the area, this after all is the reason we chose to move and raise our families in this area.
