

243129 Hogwood Farm, Sheerlands Road, Arborfield - consultation response from Berkshire Archaeology

Many thanks for consulting us on this submission of details application.

We note the inclusion of the Post-Excavation Assessment/Updated Project Design outlining the results of detailed excavation within an area of identified archaeology in parcel 7, as well as the Heritage Statement for parcels 7, 8 and 9, both of which are satisfactory. The updated project design lays out a few outstanding measures to be undertaken in order to complete the post-excavation process, and clearly states that these will be incorporated into a site-wide document once all the individual parcels have been mitigated.

We therefore recommend that the applicant is required to confirm their commitment to this overarching document and to its incorporating the final tasks recommended; once this is confirmed the archaeological condition on outline could be discharged for these parcels.

I trust this is satisfactory but please do get back to us if there are any queries regarding these recommendations
