DATE SUBMITTED : 11/02/2025

COMMENTS:

This proposed development is aiming to possibly quadruple the amount of people living on site by adding the same number again of pitches but also possibly 20 mobile caravans which could all contain families . Meaning potentially 30 homes in total. Unless there is proper assessment of flooding, drainage and sanitation for this potential number of people then this proposal should not go ahead. The previous conditions applied to application 241486 have not yet been met and should be before any further development is considered
