COMMENTS:

We wish to submit our objection to the planned application for 40 new houses off Longwater Road. This would severely impact the local wildlife, which has already come under pressure from other local developments. The bodies of water, including Long and Blackwater Rivers, allows for birds and other wildlife to nest and live in the local area and the adjoining nature reserve.

We are also aware of the limited local services in the area, and the fact that there are limited school and NHS places currently, without the addition of up to 160 new inhabitants.
