COMMENTS:

I strongly object to the proposed community building construction due to the significant impact on traffic congestion and noise levels in the area. The increased footfall and vehicle movement will exacerbate existing traffic issues, leading to safety concerns for pedestrians and residents. Also, the rise in noise pollution, particularly during evenings and weekends, will disrupt the peace of the neighborhood.

As someone who regularly visits the area due to children's activities and family/friends, I am concerned that these developments will negatively affect the quality of those visits. The increased traffic and noise would directly impact these activities, making the area less accessible and enjoyable for visitors.

Further concerns include parking constraints, potential strain on local infrastructure, and environmental impact. I urge the council to reconsider this application
