COMMENTS:

I support this application for the following reasons:

- The current provision is in urgent need of upgrading.
- My wife is a volunteer and regularly travels into central Reading by car to the current location. This new proposed location will give us the opportunity to walk to the venue via the main roads or the paths across the Ryeish Green fields. These routes have provided a safe access for us to and from the adjacent church in recent years.
- As frequent attendees of the adjacent church, we'll be able to reduce our travel by visiting both venues from one journey more often.
