COMMENTS:

This is madness .. there is poor access into and from the site onto a narrow A road. I use the road both ways almost daily , quite often held up by lorries parked and waiting to access the adjacent tyre warehouse . In the unthinkable event of a fire how would fire services get access to the facility.The site is very close to lakes and the river Loddon . Any accidental leaks will pollute our water table and bleed into the lakes. Could not be a more unsuitable position for this type of storage .This must be stopped. Terry Saxby
