COMMENTS:

This site is adjacent to Charvil Country Park, there are several Lakes which are stocked with a variety of Fish. The area is prone for flooding in times of heavy/continuous rain and as such any oil spillage could find its way into the lakes. Traffic congestion would pose a major problem as frequently there are large articulated trucks carrying Tyres parked hazardously on the Old Bath road.

Having

observed this situation for myself it is an accident is waiting to happen. This is also a route for Schoolchildren at certain times of the day. On the grounds of Environmental concerns, safety concerns and traffic congestion I strongly object to this planning application
