

Flashings and installation products

Flashings

The Heritage conservation roof window is constructed with a built-in insulation collar in the window frame. Install the VELUX Heritage conservation roof window by using a genuine VELUX flashing solution into slates and plain tiles. Our EDU 1500 flashing is designed specifically for the exact size and shape of the Heritage conservation roof window and includes underfelt collar BFX to create a perfect weathertight fit. The flashing is made by use of aluminum only.

Blinds, awnings and shutters

VELUX Heritage conservation roof window is compatible with translucent and blackout blinds for ultimate light control. Please contact your local VELUX sales company for more details.
