Comments submitted to Highways:

My comments are in relation to the unsuitability of Range Road to cope with the extra traffic that is being created by the current Planning Applications. This will hugely increase if the Applications aren't rejected.

I've lived in Range House on Range Road for 25 years and in that time I've seen it all. However, the current situation is of a different order of magnitude. The "Road" is actually a rutted unmade single track Byway - with NO passing places along its entire length. The only "passing places" are private driveways and I for one do not give my permission for drivers to use it. There appears to be an assumption that it's perfectly acceptable for vehicles, some very big ones, to pull into my driveway because it's convenient for them to get past other vehicles. Well, it isn't and I feel that this isn't correctly recognised.

Please take my situation and comments into account when you or your Department are being asked for your input into Planning Applications on Range Road.

Thanking you in anticipation.

Kind Regards,

Stephen Eddy

Range House, RG40 3NR
