COMMENTS:

Please can you consider rejecting this proposal as it is not wanted. It is not part of the local development plan. The residents did not want it before and reducing the number of houses does not make it any better. The local school and GP surgery would not cope with the additional influx, nor would the current sewer infrastructure. The area is known wildlife habitat and has the reclaimed quarry next to it which is trying to encourage more species to the area and new construction would counteract this. Where would the SANG go, as not all the all the animals and birds from that area are aquatic or could resettle in that area?
It really isn't wanted or needed and we would be grateful as residents and constituents if you would reject this request once and for all.

Thanking you in advance.
