COMMENTS:

As someone about to purchase a property in the vicinity, I have serious concerns about the effect the proposal off Basingstoke Road will have on the area.

For one, the charming rural landscape which supports local wildlife, as well as the public footpaths the locals benefit from, should be protected wherever possible.

For another, what seem to be unwanted additional facilities (judging by the many who are upset by the plan) will take up a large amount of land and put pressure on existing - and busy - local roads.

Please consider carefully the needs and concerns of the existing residents, and take into account the negative effect it will have on the local ecology.
