COMMENTS:

A similar application for the same area of land was submitted 18 months ago - and withdrawn. As a bordering neighbour we appreciate the need for TPOs to protect the local environment from encroaching development. Following the needless removal of dozens of trees at Monterey which led to a TPO on the land, we are fearful of a repeat of that situation here. Given the history, we would also raise concerns as to how, if approved, the 20% thinning process will be managed and monitored to ensure the remaining 80% of wonderful woodland remains.
