COMMENTS:

Whilst the acoustic barrier may provide a little reduction in noise for when the vehicle are loading/unloading, but the removal of the restriction to operating hours would also increase the noise when the hgv's are coming and going from the site. Currently there is minimal hgv traffic overnight in the surrounding roads of Headley Road East, Viscount Way, Spitfire Way and Miles Way. By allowing these units to operate 24/7 you are going to drastically increase the associated road noise and vehicle noise from their engine & refrigerator units. This will likely impact on the sleep, and therefore wellbeing, on a large number of homes. Most of the neighbouring light industrial units/businesses have NO overnight hgv movement, so it would be wrong to allow this development the removal of the restriction.
