COMMENTS:

This was created as a SANG for nature and wildlife and was assured that this land around Langley Mead would not be built on. We have a number of wildlife living here, including bats and other protected species which you will destroy. I do not understand why Shinfield is being used yet again (or even allowed to apply for further planning) to take away more Greenland. This will create even more traffic which equates to more pollution in the area. We are already over populated and the roads and nature cannot cope with more buildings and housing. Leave the nature (SANG) as promised.

I am strongly considering moving out of the area and would advise others not to move into this area if all that happens is more and more development, less clean air, less nature, less character in what was once a lovely village to live in.
